

Men's Work - Saturday March 5, 2022
CHC Grounds Improvement Projects

Saturday March 5th - 9:00AM – Noon (rain date March 12th) We need men to improve grounds at the back of the church. Young people ages 12 and up are warmly invited to participate! We will have a mix of projects suitable for different ages and interests. These will include clearing of invasives along the woodland edge, constructing brush piles for wildlife, collecting and repurposing rubble, and improving the garden path on the periphery. We've chosen the early Spring date to get ahead of chiggers and ticks!

1. **Invasive Plant Projects** *Cut invasive vines, remove invasive plants, and clear an access to the pond along the woodland edge to facilitate invasive removal and control.*

2. **Wildlife Brush Pile Projects** *Use accumulated brush, dead wood piles, and other repurposed materials to construct several woodland brush piles for wildlife.*

3. **Rubble Projects** *Collect rubble from around the property for consolidation and repurposing (e.g., path water bars and brush pile construction).*

4. **Garden Path Projects** *Level the path on the woodland periphery using on-site fill, install and grade water bars to divert drainage, and install log retainers along sides of path.*
